# Resource Recommender Enhanced Search Capability

November 2023

Resource Recommender now supports the following enrichments so that the search query does not have to exactly match the searchable tag to display the matching recommendations:

Type of Enrichment	Search Query	Searchable Tag
Synonyms	FDA	food and drug administration
Inflections (English only)	history	histories
Stop words (English only) are ignored in the search query and searchable tag: <b>a, an, and, are, as, at, be, but, by, if, in, into, is, it, for, of, on, or, no, not, such, that, the, their, then, there, these, they, this, to, was, will, with.</b>	harry potter stone	harry potter and the philosopher's stone  <b>Note</b> By default, at least 75 percent of the search terms (not including stop words) must be included in the search query to return a recommendation. In this example, three out of four words match the tag.
Words ordered differently from searchable tag	harry potter	potter harry

**Albert Einstein** | 1879–1955

German-born theoretical physicist; developer of the theory of relativity

Albert Einstein was a German-born theoretical physicist, widely acknowledged to be one of the greatest physicists of all time. Einstein is known for developing the theory of relativity, but he also made important contributions to the development of the theory of quantum mechanics. Relativity and quantum mechanics are together the two pillars of modern physics. His mass–energy equivalence formula  $E = mc^2$ , which arises from relativity theory, has been dubbed "the world's most famous equation". His work is also known for its influence on the philosophy of science. He received the 1921 Nobel Prize in Physics "for his services to theoretical physics, and especially for his discovery of the law of the photoelectric effect", a pivotal step in the development of quantum theory. His intellectual achievements and originality resulted in "Einstein" becoming synonymous with "genius".

User Question

How did Charles Dickens' childhood affect his novels?

AI Generated Answer

Charles Dickens reflected on his hard life experiences in his works and wrote about his childhood in many of his novels. His heroes often are young children who suffer hardships and who are living with a sense of loss. Among the hardships that these children face are the bad working conditions in England at the time. Charles Dickens's novels include a wide range of experience, but he wrote more extensively of children than any other subject. That the author understood the minds, motives, and consciences of children if reflected in all of his childhood creations. But most of the children in his earlier novels do not reflect the depth and quality of characterization as do those of his later period. Much of Charles Dickens' art seems to have come from his childhood. It was, by his own account, a miserable one, marked by poverty and abuse. Yet it seems to have given him a special empathy for the poor and mistreated, an empathy that shines through in his novels. Dickens' treatment of childhood in his novels was a reflection of his own childhood. Charles Dickens' childhood was full of genuine Dickens figures; yet he was writing as an adult remembering his childhood. Charles Dickens indicated that the colorful people he met because of his childhood travels influenced many of his literary characters and provided the inspiration for many of his plots. Charles Dickens grew up in poverty and frequently had to move with his family in search of work. His father was imprisoned for debt, and Dickens himself was briefly imprisoned when he was unable to pay his own debts. These experiences likely influenced his novels, in which the poor and mistreated often suffer. Dickens' novels may have different after-effects in later life, such as causing rebellion and vomiting when they were read in childhood, but they may elicit affection later in life, when they call up memories.

- Kunnen gebruikers van gemengde campussen werken aanvragen via IBL ?
- Referenties die gegenereerd worden in Limo. Hoofdstuk van boek: zou begin volgend jaar opgelost moeten zijn. Editie niet altijd getoond.
- Resultatenlijst sorteren op titel. Gebeurt niet altijd goed. Lidwoorden niet meegeteld, maar daarnaast ook nog fouten.
